Base Layer short sleeve undershirt

SKU: 62_121_115

CHF 57

The BASE LAYER sits like a second skin. The polypropylene material provides a dry and pleasant-to-wear sensation. The fibre passes humidity out quickly. Thus the skin remains dry longer in summer as well as in winter. For the utmost needs with high physical activity, this is the right underwear. 88% polypropylene, 8% elastane, 4% polyamide.

What is Baselayer: Base Layer are the parts that are worn directly on the skin. (Underwear) These “suck” sweat away from the skin and pass it on to the mid-layer. This leaves the skin dry and reduces the chance of cooling by evaporation, one remains more efficient. That’s why professional footballers always wear under-shirts under high temperatures. Ideal for outdoor sports and outdoor activities.

Product description:

- Material: 88 % polypropylene, 8 % elastane, 4 % polyamide.
- Colour: White
- Sizes: S, M, L, XL
